OCTOBER 2018

# **Country of the Month: America**

The United States of America is the world's third largest country in size and nearly the third largest in terms of population. Located in North America, the country is bordered on the west by the Pacific Ocean and to the east by the Atlantic Ocean. *America*, is a *country* composed of 50 states. American flag has three colors: red. Blue and white. There are 50 stars on the flag which represents 50 states

of USA. The currency used in USA is called DOLLAR.

'With few exceptions, music has been for some centuries the art which has devoted itself not to the reproduction of natural phenomena, but rather to the expression of the artist's soul, in musical sound.

-Wassily Kandinsky

# Artist of the Month: Wassily Kandinsky

Childhood. Wassily (Vasily) Wassilyevich **Kandinsky** was born in 1866 in Moscow to well educated, upper-class parents of mixed ethnic origins. Russian-born a painter . a musician and a lawyer .This was when the gaudy flowers of Wassily Kandinsky's paintings burst from their buds. Music - and the idea of music - appears everywhere in Kandinsky's work.

M and J in the Nutshell -- Famous artwork of Kandinsky

### **Basic Rules of Being Effective Parents**

### **Boundary Management**

Just think that you are in a city which you have never seen before, trying to find the place you want to reach without any traffic signs. Reaching your destination at the first road (<u>you pick/first try</u>) is hard. You will go into(<u>take</u>) wrong roads, try to find your destination in wrong roads and learn how hard it is to find your destination without traffic signs. Now let's see it from children's point of view.

When –us- humans come to life, throughout our physical and phychological development periods we go through various stages in order to understand the rules and conform our behaviour to social life. Children need their parents' guidance while identifying the world surrounding them. Newborn babies try to see if the world is a safe place or not. When they start to walk, they try to learn what the objects around them are and how they are used. During toilet training they gain their autonomy. When they reach the age of 3 they begin to understand the importance of socialization and physical differences. Every period has(demands) a different need so there will be different behaviours. Therefore, when we teach(explain) our children the rules of the world, firstly we must know their developmental specialities(features) and we should guide them by taking their personel characteristics into consideration. In additon to these; we need to pay attention to some stages while teaching the rules. These stages are;

Share emotions and direct their focus(attention),

Give the messages with action,

Give your child some responsibilites, use an understandable speech(use plain language) and be consistent about what you want,

Speak with your normal(regular) voice. Speaking loudly mostly leads to loss of control,

Identify the results and support statements with your actions when needed,

Avoid threats while identifying results,

Give two or three choices and get your child choose among them.

Firstly, while doing all of these, the most important thing is get to know your child and share the emotions. During preschool period a child doesn't know boundaries and wants to investigate the world. Moreover, the child has difficulties in identifying emotions and understanding physical and phsycological fluctiations in the body (in the aftermath.)? Remember that a child who feels understood is always one step closer to cooperation...
